

LEGEND FITNESS®

STANDING LEG CURL

(Part 3175)

- Self-adjusting, fully upholstered roller pad.
- Diamond plate foot platform.
- Chrome-plated Olympic weight peg.
- Fully welded frame for maximum rigidity, strength and durability.

Don't let the compact low-profile design fool you. The Standing Leg Curl has a lot going for it. The self-adjusting roller pad and offset pivot accommodate a wide range of user heights. The hip pad and rubber handgrips keep you stabilized while the single-leg training enhances the focus on your hamstrings. A large, checker foot platform and the big steel frame provide a rigid piece of equipment. Grab a few reps and understand what "biomechanically correct" is all about.
