

LEGEND FITNESS®

PERFORMANCE SERIES DOUBLE-SIDED HALF CAGE

(Part 3155)

- Two users can lift on opposite sides at the same time.
- Each side is a single welded piece for the ultimate in rigidity.
- Two pull-up bars, one is 1¼-inch in diameter, the other is 2 inches in diameter.
- Chrome plated, fully welded plate storage.
- Two-inch hole spacing with laser-cut numbering.

It's all in a day's work when you incorporate the Double-Sided Half Cage into your training. You'll be amazed at how quickly workouts can be completed when two athletes can train simultaneously. Long safety arms stand guard when the load becomes too much. The Double-Sided Half Cage can be bolted to a lifting platform or be used totally alone. Besides being infinitely adjustable, this double threat features generous plate storage, the strongest welded J-hooks in the industry, a standard chin bar and a "FAT BAR" chin bar for training variety. 2-inch hole spacing (center-to-center) on the uprights.

The weight of the 3155 with hooks and safety arms is approximately 470 pounds. It can hold approximately 2,100 pounds of plates, bars, etc. for a fully-loaded weight of about 2,570 pounds.

NOTE: On Performance Series cages, all attachments are in the Silver Vein finish. When the Two-Tone Powder Coat Finish option is selected, this allows a second color to be applied to the crossmembers only. However, if the Monster Hooks option is selected along with the Two-Tone option, the second color can then also be applied to the hooks and safety arms.
