

the **PRO** SERIES **MODULAR** cage system

F1 3268-F1 FUSION 1 INSIDE LAT PULLDOWN/SEATED ROW MODULE

Space-conserving design turns your modular cage into a two-in-one device.

The 3268-F1 is shown here mounted to a Pro Series Modular Half Cage (3264).

FUSION 1 THE BEST LAT PULLDOWN/BENCH ROW FUSION MODULE AVAILABLE

Add a 300-pound weight stack to the back of your Legend Fitness Pro Series Modular Cage for a space-saving way to boost the functionality of your equipment. The Fusion 1 Module comes fully equipped with upholstered thigh pads for the pulldown exercises, a fully welded foot plate for row exercises, and a storage hook to hold whichever isn't being used. Also included are an angled pulldown bar and a vee grip. The 300-pound stack comes in 10-pound increments. All you need is an adjustable bench--we recommend the Legend Fitness Pro Series Self-Adjusting Three-Way Bench (3222), as shown--and you're ready to get a full workout in on one piece of equipment.
