

the **PRO** SERIES **MODULAR** cage system

F4 3268-F4 FUSION 4 DESTROYER MODULE

Ground-based functional training mounted right on the back of a Legend Fitness Modular Series cage to help maximize space.

The 3268-F4 is shown here mounted to a Pro Series Modular Half Cage (3264).

FUSION 4 THE ONLY DESTROYER FUSION MODULE ON THE MARKET

The Fusion 4 Destroyer Module affixes to the rear of Legend Fitness Modular Series cages, allowing more than one athlete to exercise at once. Not only does it make use of otherwise dead space, but it gives your team the opportunity to get in some ground-based functional training on the two plate-loaded levers. Explosive, full body presses prepare athletes for the rigors of scrimmage line battle. Rigidly constructed from 11-gauge steel, the Fusion 4 Destroyer Module has high quality pillow block bearings with grease fittings and stabilizing floor buttresses. The arms rest on thick rubber bumpers and the angled, Olympic-sized weight pegs are chrome plated and feature a heavy duty cotter pin to keep weights in place.
