

LEGEND FITNESS®

HEAVY LIFTING NECESSITIES

THE MONOLIFT

Exceeds all IPF standards.

Extra wide, 73-inch lifting area.

Absence of lower rear crossmember provides more room for the spotter to operate.

Hooks/hangers easily slide for width adjustment via linear bearings.

Hangers are constructed from single steel forms that encircle the mounting point above.

Chrome-plated Olympic plate storage pegs are welded through the uprights.

Upper assembly is fully welded for maximum strength and to ensure proper geometry during setup.

Upper assembly tilts on bearings, rather than using a bolt as the pivot point.

MONOLIFT

Part Number
3908

Bar and plates sold separately.
